Projects

ShopEase April 2024 - July 2024

Developed ShopEase and about to launch, an app addressing key challenges for shopkeepers and residents in tier-two cities by implementing task scheduling, digital ledger management, real-time shop status updates, and consolidated delivery services. Spearheaded UI development, feature integration, and project planning.

ChatBot for room Booking July 2024

Developed a hotel booking chatbot that authenticates users, books rooms seamlessly, and sends confirmation emails. Implemented with a secure login system and integrated automated email notifications for booking confirmations. [VideoLink](#)

taken.ai July 2024 - October 2024

Created Teken.ai, a comprehensive AI platform offering access to all premium AI features under one subscription. Integrated Gemini AI for free basic features, providing a seamless and cost-effective AI solution for users.

TaskFlow June 2024 - July 2024

Developed a multifunctional app for task management, water tracking, and financial tracking. Includes unique features for developers like GitHub heatmap monitoring with streak reminders and LeetCode progress tracking and many more.
